

GAMING FASHION AWARDS.

The platform turning digital fashion in gaming into
an organized industry — with rules, talent, and a
market.

Digital fashion is already a market. What it lacks is **an industry.**

Players spend over \$40 billion a year on skins and virtual apparel inside videogames — more than the entire luxury accessories market. The brands are there. The creators are there. What's missing is the structure that connects them, validates them, and brings them to market.

01	The brands are here DEMAND	Balenciaga × Fortnite, Gucci × Roblox, Louis Vuitton × League of Legends: luxury has chosen gaming as the channel to Gen Z. But every activation is an isolated experiment with no industry counterpart on the other side.
02	The talent is here SUPPLY	Thousands of 3D designers build digital garments with professional tools. No institution recognizes them, curates them, or brings them to market. The talent stays invisible to the brands looking for it.
03	The connection isn't GAP	There is no authority validating talent, no platform matching creators to brands, and no framework distributing digital assets beyond the game they're born in.

A multi-billion-dollar market with no anchor. **That's where GFA is built.**

Three industries. One trajectory.

Digital fashion and gaming are two halves of one market: digital identity.
The creator economy is the force closing the gap. GFA is what organizes the convergence.

THE TWO MARKETS

Digital fashion and gaming: two halves of the same coin — the digital identity of people.

THE CREATOR ECONOMY

Not a third market — the force pulling the two worlds together and triggering the convergence.

THE MISSION

The Shift is where GFA begins. The Lock is the goal: a single, organized market.

You don't claim an intersection. [You organize it.](#)

01 • CONTEXT • THE THESIS

Not an award. The infrastructure **of a sector.**

| **01 Attention** Award & media engine | **02 Network** Creator platform | **03 Revenue** Rights & asset layer

GFA uses the award format to ignite the market — it's the fastest way to create attention and authority — but it's engineered as a platform. Every edition produces three assets that compound: media coverage, qualified creators in the network, and commercial inventory for brands.

BUILT AS A PLATFORM • POWERED BY ATTENTION

Three forces converging in the same 18 months.

Digital fashion in gaming was a thesis a few years ago. As of 2025, it's a market with critical mass, professional supply, and consumer-grade tooling. The window to build the institution is now.

DEMAND

Cultural critical mass

Fortnite × Balenciaga, Nike × Roblox (NIKELAND 21M visitors), LV × League of Legends, Gucci Vault. Luxury isn't experimenting in gaming anymore — it's committed. The pattern is recurring, not one-off.

SPEND

Skin economy past escape velocity

\$40B+ a year on in-game skins and cosmetics (Newzoo/SuperData). Roblox alone reported \$2.7B in fashion-adjacent revenue 2024. Mainstream financial press now covers it as a category.

SUPPLY

Creator tooling at consumer scale

Generative 3D (Meshy, Tripo, Tencent Hunyuan 3D) has dropped asset-creation cost 10×+ in 18 months. The 2025-26 designer cohort is ready to ship at volume — and looking for a stage.

The market is ready. The talent is ready. **The institution is missing.**

The asset catalog.

Twelve award-validated 3D garments. Each one is catalogued like an inventory item — with the four fields below.

One asset, six output formats.

One awarded garment, rendered once and auto-packaged into six distribution-ready formats.

01	Editorial stills	PRESS
02	Game-ready file	ENGINE
03	AR try-on	MOBILE
04	Techpack	PRODUCTION
05	Social cuts	SOCIAL
06	Runway capture	EVENT

One submission. Six distribution formats, production-ready.

One system. Three layers that compound.

Each layer creates value on its own. Together they form a flywheel:
attention attracts creators, creators produce assets, assets bring back
brands and attention.

LAYER 01 ATTENTION	Award & media engine	Awards night, press coverage, social content. Peak industry visibility: it produces audience, cultural authority, and the sponsor revenue that funds the system.
LAYER 02 NETWORK	Creator platform	Where attention becomes infrastructure: verified profiles, virtual runway, voting. Every edition converts visibility into active creators and proprietary platform data.
LAYER 03 REVENUE	Rights & asset layer	Where the network turns into recurring revenue: commercial distribution of award-winning assets, scaling to direct deals with gaming publishers from Year 4.

Attention builds the network. The network builds the business.

Five modules. One web environment.

- CREATOR PROFILES
- VIRTUAL RUNWAY
- ASSET HUB
- COMMUNITY VOTING
- EXPERT JURY

The annual event becomes permanent infrastructure — making talent visible, measurable, and commercial.

The product is the creator journey.

Five screens, one continuous flow — every step generates content, data, and sponsor value.

03 SELECTION
Community vote + expert jury

04 AWARD
Win your category

05 DISTRIBUTION
Earn from the asset layer

The event lasts one night. What it produces lives on the platform.

Built on proven tech. **Not a research bet.**

There's nothing to invent. We assemble mature, off-the-shelf components — so the pre-seed buys execution and speed, not science. The result is low technology risk and a product that's live, not theoretical.

No technology risk

A standard, off-the-shelf web stack — the same proven tools behind thousands of products. Costs scale only as editions grow, so the platform never weighs on the plan.

Instant 3D, in the browser

Award-winning garments load and spin in any browser — no app, no download, no plugin. Frictionless for the creators who upload them and the brands who view them.

Every asset becomes content

Each uploaded garment auto-generates social-ready video — fuel for the media engine with zero post-production cost. The catalog markets itself.

A selection you can trust

Community votes are protected against manipulation and balanced with an expert jury. The credibility of the award is the asset brands pay for — so we defend it.

Digital assets: a second revenue line, on a delay.

Every edition produces an archive of award-winning, validated digital garments. GFA organizes their commercial distribution — a label model, not a marketplace.

01

Distribution rights

THE MODEL

GFA distributes the assets; copyright stays with creators. A label model: the platform brings the market, the talent keeps the work.

02

Gradual activation

Y2 → Y3

Monetization starts as a minor line: catalog, standards, and contracts get built while demand matures.

03

Publisher deals

Y4+

Award-winning assets into games through direct publisher deals. Outside the 3Y plan, inside the trajectory.

\$25K

DIGITAL ASSET REVENUE • Y2

\$73K

DIGITAL ASSET REVENUE • Y3

65/35

REVENUE SHARE • CREATOR / GFA

Optionality, not a bet.

BUILT NOW • MONETIZED WHEN READY

A large market. Measurable. **Unclaimed.**

TAM • GLOBAL GAMING

~**\$190B annual market** (Newzoo 2025) and over 3.4B active players. The largest cultural platform on the planet. 90% of Gen Z plays regularly.

SAM • FASHION INSIDE GAMING

\$40B+ a year in in-game skins and cosmetics (SuperData/Unity). The largest existing digital fashion market — larger than all luxury accessories combined — with no institution and no infrastructure.

SOM • THE 3Y PLAN

\$1.0M Year 3 revenue: a conservative slice, under 0.003% of SAM. Built on sponsorship and partnership — not on consumption assumptions.

Demand is already there. **What's missing is who organizes it.**

Three audiences. **One system. One payer.**

The model works because each of the three audiences gets something it doesn't have today — and one of them pays for it, gladly.

WHO PAYS

Brands & sponsors

Fashion, luxury, beauty, and tech chasing Gen Z where they spend their time. Today they enter gaming through isolated, expensive experiments. GFA offers a recurring, measurable, culturally credible channel.

→ **SPONSORSHIP: THE PLAN'S DRIVER**

WHO CREATES

Creators & 3D designers

A growing global community with professional tools and no legitimacy channel. GFA delivers what they're after: visibility, industry validation, and brand access.

→ **65/35 REVENUE SHARE IN THEIR FAVOR**

WHO PARTICIPATES

Gaming audience

Gen Z and Millennial gamers already used to buying digital identity and following creators. The vote makes them part of the selection — and a profiled audience for sponsors.

→ **\$40B+ ALREADY SPENT ON SKINS EVERY YEAR**

The audience doesn't need to be educated. **It just needs to be in the same room.**

Three vectors of defensibility.

Our closest competitor is **Fashion in Gaming Awards** — the highest-threat player in our competitive scan. But it's an award show. GFA competes on a wider perimeter: [a platform, a creator pipeline, and an asset layer](#) — not just an awards night.

01

Fashion credibility

THE LAUNCH

Debuting inside Milan Fashion Week gives the award an authority no gaming-native event can replicate.

02

Creator pipeline

THE ASSET

The roster grows with every edition and stays proprietary. Anyone stuck in annual-event mode can't copy it.

03

Rights & asset layer

THE OPTIONALITY

Asset distribution is a revenue line no award show owns — and it can't exist without the network.

Others organize awards. [We're building the infrastructure of a sector.](#)

Three revenue lines. One clear driver.

It starts with sponsorship — the fastest revenue to close — and progressively activates the platform lines as the network grows.

REVENUE STREAM	Y1	Y2	Y3	TREND • STATUS
Sponsorship (Platinum + Gold tiers)	\$120K	\$600K	\$900K	 • PRIMARY DRIVER
Organic media (\$1.50 RPM)	.	\$3K	\$29K	 PROGRESSIVE ACTIVATION
Digital asset (65/35 share)	.	\$25K	\$73K	 OPTIONALITY Y2-Y3 • Y4+
Total revenue	\$120K	\$628K	\$1.0M	 • 8.4x GROWTH Y1-Y3

100%

Y1 REVENUE MIX • SPONSORSHIP ONLY

~90%

SPONSORSHIP IN Y3 MIX • NEW LINES RAMPING

Y4+

DIRECT PUBLISHER DEALS • OUTSIDE THE 3Y PLAN

A simple driver funds the system. The system diversifies the mix.

Global from day one. Milan is the launchpad.

The product has no geography: creators, voting, and content are online from day one. Milan is not a perimeter. It's a credibility lever.

We start where fashion has the most authority. We scale where gaming is already everywhere.

A roadmap anchored to one date.

September 2027, inside fashion week. Every milestone before that date is verifiable.

From pre-revenue to **break-even in 36 months.**

36.9% Y2

EBITDA MARGIN • Y3 BREAK-EVEN POINT

30% 14x

WACC EBITDA MULTIPLE • TV

Revenue: \$120K → \$628K → \$1.0M. EBITDA: \$0.7K → \$135K → \$369K. Margin grows with the platform lines — not with event costs. **For reference:** typical award-show EBITDA 10–18%; scaled media platforms 25–40%.

The event pays for the present. **The platform builds the margin.**

\$500K pre-seed

A round with a precise perimeter: bring the platform to operational MVP, formalize institutional partnerships, and arrive at the September 2027 launch with the sponsor pipeline running.

50% • \$250K

Engineering & product

MVP build, UX/UI, 3D pipeline, asset architecture. Contracted milestones with dedicated IT partners.

20% • \$100K

Production & event

Pre-launch event operations, venue, logistics, and ceremony build-out for September 2027.

20% • \$100K

Marketing & PR

Brand identity, editorial framework, community acquisition, and pre-launch press push.

10% • \$50K

G&A + buffer

Legal, incorporation, accounting, and operational reserve. Indicative allocations, tied to Y0 milestones.

Deal terms

~\$2.5M pre-money

Post-money ~\$3.0M • equity ~16.7%. Seed round contingent on Y0 milestones. Indicative terms; full term sheet on request.

The pre-seed buys [verifiable milestones](#), not promises.

Twelve months. Five proof points.

Year 0 is where the project stops being an idea and becomes a measurable company.

Founder-led today. Core team forming post-round.

GFA is driven by its founder, with a focused core team joining as the round closes. Capital goes into the product — and the people who ship it.

FOUNDER • CHAIRMAN & CEO

Francesco D'Onofrio

Sets strategic direction, leads fundraising, and owns institutional relations. *[Founder background — prior ventures, track record and recognitions — to be added from founder materials.]*

TECHNOLOGY

CTO • Tech Lead

To be appointed post-round — brings platform development in-house.

MEDIA

Head of Content

To be appointed post-round — runs the media engine and editorial channels.

NETWORK

Creator & Community Lead

To be appointed post-round — drives roster growth and community.

STRATEGIC ADVISORS WDA — financial & investor readiness • Andersen — legal, IP & contracts

Every dollar in the round has a destination: [the product and the launch](#).

Organizing the convergence.
